- Sierra's text based programming screens are intuitive so even your first time it's easy to program
- All text programming and data screens are displayed in the language selected, English, Spanish, or French

What your customer wants: *clean dishes every time*

- When a rep has to service an account, they lose time and the account has poor cleaning quality or dirty dishes piling up while they wait. Sierra's alarms diagnose problems so accounts can self-service, saving everyone grief and keeping dishes consistently clean
- CHECK PRODUCTS: Instructs kitchen workers to replenish chemical supply.
- DRAIN TANK: Instructs kitchen workers to drain the dirty tank water so the account can be assured their dishes will always be clean
- ADD DETERGENT: Instructs kitchen personnel to replenish detergent supply.
- DET FEED FAILURE: Instructs kitchen personnel to delime tank

No more trouble calls

*Sierra makes scaled probes
work like new!*

- Sierra's VCP software measures how dirty a probe is and corrects for it, so you don't get trouble calls to clean the probe
- Sierra's flex rinse tube typically lasts 6 times longer (or more) than competitor's tubes; think of what eliminating even three trouble calls per account is worth!

No need for a mechanical rack counter--it's built in

- Sierra counts the total number of racks washed, up to 99,999,999, so billing by the rack is easy!
- Want other data? Sierra also displays tank conductivity, temperature, and the status of input signals, and counts the number of racks since the last drain, pump runtime to benchmark tube and motor replacement, and wash on hours.

Ordering details

- Sierra is available in either two or three product systems, and the first product position can be ordered as either a pump, plastic solenoid, or metal solenoid
- Sierra has a universal power supply, operating on constant power 100-240 VAC
- Sierra can be ordered direct from Beta customer service toll free at (800) 858-2382, or (831) 426-0882 from outside the US
