## Summit TUV Compliance Improvement

TUV compliant Summit units are now available! Customers in Germany and elsewhere have requested that Summits comply with not only CE but TUV, and we're pleased to announce that we have TUV approval and can now ship. Item numbers and pricing will remain the same, and all units shipping after February 1, 2003 are TUV compliant. The TUV units feature some minor changes:

- Grounding changed to ring terminals
- Terminal block was made taller
- Terminal block sticker changed
- Eliminated extraneous labels from inside of pump box
- More translated text added to manual
- TR6000 PCB had minor alterations
- Rating labels for pump box and TR6000 now have TUV's logo; TUV approval is not required on the programmer because it is low voltage.

For customers who don't require TUV, the only significant change is the grounding connection. Summit XL has been designed to be TUV compliant upon release, which we expect in late February.

Ring Terminal  
Terminal Block Sticker  
Moved to Front of Terminal Block  
Taller Terminal Block

*Inside of Summit, TUV Compliant*

*Inside of Summit (with power cord), Non-TUV Compliant*
